Authors: Muhammad A Shah, Roshan Sharma, Hira Dhamyal, Ankit Shah, **Dareen Alharthi**, Massa Baali, Hazim Bukhari, Joseph Konan, Soham Deshmukh, Bhiksha Raj, Rita Singh.

EXPERIENCE

Head Teaching Assistant for Advanced Natural Language Processing Carnegie Mellon University

January 2026 – Present

- Coordinate TA meetings, set agendas, and plan timelines for upcoming deadlines.
- Prepare materials for the course (writing quizzes and homework)
- Mentor students on course projects, providing guidance and technical support.
- Grade homework and provide feedback.
- Hold office hours to address student questions.

Teaching Assistant for Advanced Natural Language Processing Carnegie Mellon University

August 2025 – December 2025

- Prepare materials for the course (= and homework)
- Mentor students on course projects, providing guidance and technical support.
- Grade homework and provide feedback.
- Hold office hours to address student questions.

Teaching Assistant for Introduction to Deep Learning Carnegie Mellon University
January 2024 – December 2024

- Lead recitation sessions.
- Mentor students on course projects, providing guidance and technical support.
- Design and develop homework assignments.
- Grade homework and provide feedback.
- Hold office hours to address student questions.

Research Scholar Carnegie Mellon University August 2023 – July 2024

- Conducted research in speech synthesis and voice biometric estimation. Contributed to ongoing projects in the MLSP Lab with Prof. Bhiksha Raj, focusing on evaluating and benchmarking speech and voice representation models.

Deep Learning Team Lead at ISE October 2021 - August 2023

- Design ML systems and distribute tasks between team members.
- Research and implement the appropriate DL algorithms.

- Select appropriate datasets and representation.
- Analyze results for stability and validity.
- Create demos, documents, and present findings.

Deep Learning Engineer at ISE September 2020 - October 2021

- Enhance and build speech and computer vision systems on private real-world data.
- Implement models from scientific papers.
- Customize state-of-the-art systems on limited data.

Artificial Intelligence Engineer Intern at TAHAKOM June 2020 - September 2020

- Implement scripts to analyze satellite imagery.
- Research and present state-of-the-arts solutions for detecting vehicles from satellite imagery.
- Build and train object and change detection models for satellite imagery.
